

# MACHINES FOR AMBER

Set of machines for amber processing is an efficient solution for stone processing factories. **Creating of multiple shapes or drilling** becomes easier by use of our equipment. The circular sawing machine P2 cuts precisely by means of water-cooled diamond blades. SZK, SK2 or SKU facilitate shaping of different materials (e.g. synthetic and precious stones, glass, ceramics).

Processing is performed by use of template and **diamond discs**. Mostly used shapes are: oval, balls, polygons, however it is also possible to obtain more sophisticated geometries by use of high speed spindle.
